

FinancePilot Engineering Handbook v0.1

Vision

Build a cloud-native personal finance assistant on Azure. Start with Monefy CSV import, then evolve into a WhatsApp-based AI assistant.

Goals

Learn Azure by building a real product; create a portfolio project; understand backend architecture and cloud deployment.

MVP

CSV Upload → Parse → Store → Query transactions.

Architecture

FastAPI → Azure App Service → Azure SQL → Blob Storage → Azure Functions → WhatsApp (later).

Sprint Plan

Sprint 0: Planning
Sprint 1: Local FastAPI + CSV Import
Sprint 2: Azure Deployment
Sprint 3: Azure SQL
Sprint 4: Blob Storage + Functions
Sprint 5: Dashboard
Sprint 6: WhatsApp
Sprint 7: AI Insights

Engineering Principles

Write clean code, commit frequently, document decisions, test each feature before moving on.

Definition of Done

Working feature, tested locally, committed to Git, documented, ready for next sprint.
